EXPANSION PRODUCTS & SERVICES

Valves Instruments Plus Ltd are proud to offer technically advanced engineering solutions to Consultants, Mechanical Design Engineers and Mechanical Installation teams throughout the United Kingdom. We pride ourselves on our commitment to quality and our expertise in providing cutting-edge design solutions to complex engineering problems.

VIP can mark up customer's drawings to show the required location of expansion joints, anchors & slide guides. We provide comprehensive technical design support covered by our comprehensive professional indemnity insurance.

VIP can also provide a spring hanger and mount take off service for noise and vibration sensitive areas.

We can also select aluminium or steel inertia base and spring mount packages to suit the size and weight of your plantroom equipment.

The VIP team are happy to bring our years of expansion expertise and product knowledge to site, assisting customers to ensure all expansion joints and bellows will perfectly match your site's unique requirements.

Our on-site technical appraisals ensure installations are performed in accordance to the latest industry standards and practices, and ensures safety and peace of mind for our customers.

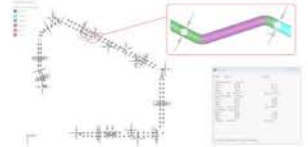

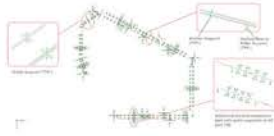

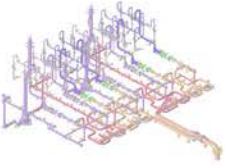

We regularly provide a wide variety of technical seminars and courses on all manner of pipework expansion, vibration control and air filtration topics. We can happily deliver these presentations at your premises and can tailor content to your own specific needs. VIP Ltd regularly deliver CIBSE Accredited courses.

PIPE STRESS ANALYSIS

Valves Instruments Plus offer comprehensive Load Reports using the latest software.

Our cutting-edge Pipe Stress Analysis offers our customers a level of support far beyond the competition, Our package of technical assistance, combined with our decades of first-hand product experience and knowledge, makes us the perfect choice for any expansion project.
